

# The Great Western News

August 2008

Ask Mr. Janitor:  
In today's world,  
many of us have to  
do our cleaning with  
a smaller staff. How  
can we keep our  
buildings clean and  
safe while dealing  
with fewer workers?

Mr. Janitor Answers:  
Let me introduce you  
to the Kaivac Cleaning  
Systems™ company.  
They manufacture a line  
of no-touch cleaning  
machines that will allow  
you to clean better and  
faster without you or  
your staff ever having  
to touch the surfaces  
you are cleaning. This is  
no-touch cleaning with  
green chemicals that  
will give you better  
results at less cost and  
in less time! Really!!!

## Clean With Better Results At Less Cost In Less Time

Imagine cleaning your restrooms, shower rooms, locker rooms, kitchens, steps, hallways, and even carpets, and doing it in one-third the amount of time normally required. The best news is that even though you spend much less time cleaning, the results are actually better than when using traditional methods. You know the results are better because you can measure them with the ATP meter. Not only can you clean faster and better, you never touch any of the surfaces being cleaned. You have just experienced the Kaivac No-Touch Cleaning™ System.

Traditional cleaning methods are simply inadequate to meet today's expectations of clean. Outdated wipers and mops, whether traditional or microfiber, simply spread contaminated water around, failing to penetrate into the nooks and crannies where soils, odors, bacteria, and viruses hide. With traditional cleaning methods, only a small portion of soil is removed, leaving behind urine and other food sources for disease and odor causing bacteria. Worse, workers are forced to crawl around filthy restrooms and other areas on their hands and knees wiping contaminated surfaces and fixtures by hand.

The No-Touch Cleaning™ revolution is changing the face of the cleaning industry. Designed for maximum removal of soils, bacteria and other contaminants, No-Touch Cleaning™ combines automatic chemical metering and injection, an indoor pressure washer and a powerful wet vacuum into a single integrated deep cleaning system. Workers can deep clean and sanitize without ever having to touch soiled, contaminated surfaces. Workers simply spray cleaning solution onto fixtures and floors, and then blast the soils to the floor, completely removing soils and bacteria. The results are sparkling clean restrooms, kitchens, stairwells, shower rooms, locker rooms, hallways, and carpets and more without ever touching a contaminated surface. These No-Touch machines are scientifically proven to be 60 times more effective in reducing bacterial contamination than mops; which are likely to spread contaminants rather than recover them. In fact, these machines clean so well that they even beat the industry standards for food preparation areas. Besides cleaning better, they also cut labor and chemical costs.

These great results can be accomplished using green chemicals by Kaivac. Let me mention just one of the group of green chemicals by the name of KaiBosh™. KaiBosh is a concentrated no-rinse hospital-grade disinfectant cleaner that disinfects, cleans and deodorizes in one labor saving step. KaiBosh is effective against a broad spectrum of bacteria. It is virucidal (including MRSA, AIDS, Norwalk/Norovirus, Hepatitis B and C, Avian/Bird Flu, and more) while inhibiting bacterial growth on moist surfaces. It also deodorizes by killing microorganisms that cause offensive odors. Able to cut through grease and grime, it is an excellent cleaner, and it is a green product.

To learn more about the Kaivac No-Touch Cleaning™ System or to discuss scheduling a no-cost, no obligation demonstration of this system at your facility, please give us a call at our Davenport office at 563/445-6644 or in the Cedar Rapids area at 319/395-0445.

Please note that Great Western Supply Company offices will be closed on Monday, September 1 in honor of Labor Day. We will reopen at 7:30am on Tuesday, September 2.

## KAIVAC SMART CHOICES

Now, regardless of size, any facility with serious cleaning needs can find the perfect No-Touch Cleaning system from Kaivac. The shape, height, weight, pressure and hose length of our equipment are all designed to fit the machine to various cleaning situations and with worker comfort in mind. For example, ease of use and learning, trouble-free transport and tangle-free operation are all considered in the foundation of our design.

### THE MACHINES:

KAIVAC® 2150

KAIVAC® 1700 SERIES

KAIVAC® 1550

The original KaiVac® was designed to address the large capacity cleaning needs found in larger facilities, such as: high schools, universities, airports, convention centers, factories, warehouses, stadiums and large hospitals.

The KaiVac® 1700 series combines high capacity and compact size with an attractive price to deliver exceptional value.

Plus, they feature a removable "black box" engine compartment for rapid repair and exchange.

The KaiVac® 1550 was designed for smaller facilities that require the same cleaning power that the original KaiVac delivers, such as: elementary schools, hospitals and clinics, nursing homes, restaurants, groceries, office buildings and more.
