

## The Great Western News

Ask Mr. Janitor :  
It looks like you recently had new towel and tissue dispensers put into your rest-rooms. They sure look great! Were they expensive?

Mr. Janitor Answers:  
The dispensers modern and efficient design are very attractive. What is even better than their great appearance is the money they help us save, and the fact that they use “green” paper products from a “green” paper mill.

## Choose “Green” Paper And Save Green Money

With the right supplier, having a “green” building and going “green” does not mean you have to spend more money. In fact, with the right products from the right company, going “green” and having a “green” building can actually save you money.

This is the situation with the dispensers our friend saw in Mr. Janitor’s facility. They are the *Tork Matic* roll towel dispenser and the *Tork Advanced Bath Tissue* toilet paper dispenser, both from SCA Tissue North America. These two stylish, modern dispensers are good looking and will enhance the décor of any restroom. They may also offer significant cost-in-use savings over many other dispensing systems.

The *Tork Matic* roll towel dispenser is a portion controlled, hands-free dispensing system for roll towels that provides hygienic dispensing without the need for handles or levers. Each user touches only the towel needed, reducing the risk of cross-contamination. Reliable and durable, the *Tork Matic* delivers one towel, time after time, and is always ready to service the next patron. With its large rolls and controlled, one sheet-at-a-time dispensing, the *Tork Matic* controls costs and saves money.

The *Tork Advanced Bath Tissue* toilet paper dispenser is a high-capacity dispenser. Even though it holds 60% more tissue than a conventional two roll-dispenser, it has a small, space-saving footprint. Its sleek appearance can fit into any restroom. The dispenser has an innovative auto-transfer feature that promotes hygiene and reduces waste by complete roll consumption with automatic roll change. It is a high-capacity, never empty, two-roll dispenser. It looks good and helps control costs.

The paper towels and toilet tissue that go into these innovative and cost saving dispensers are “green” products. SCA Tissue North America is a member of the U.S. Green Building Council and makes *EcoLogo Certified* Towel, Tissue and Napkin Products. Using these dispensers and these SCA paper products will promote your efforts to go “green” and to have a “green” building while saving money as well.

If you have any questions about these dispensers and paper products or about going “green”, please give us a call at our Davenport office at 563/445-6644 or at our Cedar Rapids office at 319/395-0445.
