## Total Facility Care With One Product

**Ask Mr. Janitor :**  
You know, I am glad that we are starting to clean healthier with green products. We still seem to need to use so many different products to get the job done. I wish there was a way to clean safely and effectively with fewer different items.

**Mr. Janitor Answers :**  
Your wish has come true! This month, we are going to look at one product with two different dilutions that will handle most of your normal cleaning and sanitizing needs.

Even with green cleaning products, we still need many different items. We need something to clean and sanitize toilets, urinals, sinks, shower rooms and other critical surfaces and areas; we need carpet cleaning products; we need a tile and hard floor cleaner; we need something for concrete floors; we need a glass and mirror cleaner; we need a general purpose hard surface cleaner; we need a stainless steel cleaner and the list goes on and on. There are endless items and differing surfaces that need to be cleaned and sanitized within our facilities.

Think of the simplicity and cost savings of using just one product for 95% of all of your cleaning and sanitizing needs! O.K., it is one product diluted two different ways: one ounce per gallon of water and ten ounces per gallon of water. The name of this product is Envirox™ Concentrate 118, powered by GNx2™ Technology.

Envirox™ Concentrate 118 is an environmentally friendly and people friendly, green, pH neutral, hydrogen peroxide cleaner with an EPA Registration Number which means it is an EPA approved virucide and sanitizer that kills 99.99% of specified viruses and bacteria. It can clean and/or sanitize any water safe surface within your facility, and it will clean better than many other cleaners and degreasers. We back-up this claim by offering a no cost, no obligation demonstration at your facility. What makes Envirox so appealing is its versatility along with its power and safety. Envirox is a powerful cleaner and sanitizer, yet it is safe for people and the environment. Even though it has a neutral pH of 7, it cuts greases and soils that normally require harsh products with a very high pH.

Here is a listing of some of the benefits of this remarkable product. Envirox™ Concentrate 118, powered by GNx2™ Technology is environmentally sustainable. It is an all plant derived renewable resources product. It is petroleum free. Envirox has no VOC's. It does not irritate eyes or skin, and it does not contain astmagens. It has very low human toxicity. Envirox is good for the environment. It is readily biodegradable. Despite its safety, it is a powerful and versatile cleaner. This single product will handle 95% of your cleaning and sanitizing needs. Envirox will clean counters, marble, wood floors, urinals, tile, grout, carpet, glass, VCT flooring, toilets, stainless steel and much more. Envirox will penetrate surfaces, oxidize and kill sources of odors. Envirox is a sanitizer and will kill 99.99% of specified viruses and bacteria. Envirox™ Concentrate 118, powered by GNx2™ Technology will do all this and more. It will save you money and eliminate the need for most of your current cleaning products. It will simplify your life and be safe for your people and the environment.

You have to see Envirox in use to appreciate its value. Please give us a call at our Davenport office at 563/445-6644 or in the Cedar Rapids area at 319/395-0445 to arrange a no cost, no obligation demonstration at your facility.

### Please Note

Great Western offices and warehouses will be closed on Friday, December 12 for our annual inventory. Our trucks will be delivering previously placed orders on December 12.

Great Western will be closing at 2pm on Wednesday, December 24 and will remain closed on Thursday, December 25 and Friday, December 26 to celebrate Christmas. We will reopen on Monday, December 29. We will also be closed on Thursday, January 1 to celebrate New Year's Day.

Thank You and have a Very Merry Christmas and a Happy New Year!
