

Super-Glo™ 11

SUPER-CONCENTRATED DISH AND PAN DETERGENT

PRODUCT DESCRIPTION:

Super-Glo is formulated exclusively for the Clean on the Go 3-Sink Chemical Management System. Super-Glo is a unique formula with an elevated surfactant content for higher solids and more efficient emulsification of soil, grease and other organic matter. With minimal effort, pots, pans, dishes and utensils are cleaned in preparation for the sanitation process. Super-Glo is also effective in cleaning glassware without streaking, water-spots or film residue. Super-Glo is the ideal dish and pan detergent developed especially for the three sink cleaning method. Super-Glo's free rinsing nature ensures no residual product is left on the surface to inhibit sanitizer activity.

Developed for the commercial market, Super-Glo is a superior super-concentrated dish and pan detergent and offers end users these features, advantages and benefits:

SUPERIOR SUDSING:

The elevated surfactant content and cosmetic quality foaming agents incorporated into Super-Glo provide rich, superior sudsing with exceptional cleaning action.

SURFACE SAFE/EASY TO RINSE:

The aquatic, green-blue color of Super-Glo super-concentrated detergent, coupled with the light fresh fragrance, sends the message of clean. Quickly and easily, Super-Glo rinses away without streaking, smudging, water spotting or filming. Safe to use on any surface not damaged by water.

GENTLE TO SKIN:

Lotion soft cosmetic ingredients and a neutral pH keep Super-Glo mild and gentle to most skin types.

ECONOMICAL:

Highly concentrated. Use only ¼ ounce (2 ml) of Super-Glo per gallon (liter) of water to create luxurious suds that clean easily and quickly. Superior suds retention to further economize in-use cost. Each 2-liter cartridge of Clean on the Go Super-Glo provides 270 gallons (1000 liters) of useable product for maximum cost efficiency. This concentrated formulation eliminates constant switching out of empty containers with its high yield. Kosher and Pareve approved.

LIGHT FRESH FRAGRANCE:

Super-Glo has a fresh, clean scent that is slight and does not interfere with the senses.

NSF REGISTERED:

Clean on the Go Super-Glo is NSF (National Sanitation Foundation) registered "C1" for use in inedible product processing areas, non-processing areas, and/or exterior areas of food processing establishments. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient labeling.

Accepted by the Canadian Food Inspection Agency (CFIS).

DIRECTIONS FOR USE:

Some individuals may be sensitive to ingredients in this product. Before use, read product label and MSD sheet. If questions remain, consult your employer or a physician.

Formulated exclusively for the Clean on the Go® 3-Sink System.

NOTE: Do not mix with chlorine-type bleaches or other household chemicals.

1. Always scrape dishes, pots, pans and utensils before placing them in wash sink.
2. Depress and hold Super-Glo button. Fill sink to desired capacity. Spartan's clean on the Go 3-Sink System automatically dilutes Super-Glo to ¼ oz. per gallon (2 ml. per liter).
3. Rinse thoroughly using hot potable water.
4. Sanitize with Spartan Sani-T-10. Follow directions for use on the Sani-T-10 product label.
5. Change detergent solution, rinse water and sanitizer solution as necessary.

Sink #1 (Wash Sink): Fill with hot water (60° – 71°C / 140°-100°F) and Super-Glo. Use ¼ oz. per gallon (2 ml. per liter).

Change detergent solution, as soil load becomes apparent.

Sink #2 (Rinse Sink): Fill with clear hot water.

Change rinse water often.

Sink #3 (Sanitizing Sink): Fill with water and Sani-T-10. Use ¼ oz. per gallon (2 ml. per liter). **Test sanitizer solution often. Test with quat check (QT 10 Hydrion Papers) test strips, to 200 ppm of quaternary ammonium chlorides. Change solution as often as necessary to maintain proper sanitizer/water ratio or when water becomes visibly dirty.**

1. Wear rubber gloves.
2. Submerge scraped dishes, pots, pans and utensils in the wash sink. Allow to soak.
3. Scrub all soiled items (inside and outside) with pot brush or scouring pad.
4. Submerge scoured, drained items in the rinse sink. Place small hand tools in basket. Submerge basket and shake gently to circulate water between nested

items.

Change water often in rinse sink to prevent detergent carry-over into sanitizing sink.

5. Submerge rinsed and drained items into the sanitizing sink for at least 2-minutes or for the time specified by governing sanitary code. If items are too large to submerge, rotate so that sanitizer solution touches all surfaces.
6. Remove items from the sanitizing sink and invert or tilt on the drainboard to promote drainage. Air dry.
7. Transfer clean, dry items to proper storage area.

After clean items have been removed from drainboard/drying area, drain sinks.

Fill wash sink ¼ full with fresh detergent solution and use this to brush-scrub all drainboards and sinks. Drain. Rinse all surfaces with clear water. Wipe exterior sink walls with sponge. Rinse sponges, scouring pads, brushes, etc. and air dry. Clean and store cleaning utensils.

Due to the high concentration of Super-Glo, periodic cleaning of the metering tip is suggested every three months to keep the opening clear. Soak the metering tip in a mild acidic solution or hot water (49°C / 120°F) to clean the tip's opening.

NOTE: Do not mix Super Glo with bleach or any other chemical.

SPECIFICATION DATA:

Active ingredients—34-36%

pH (concentrate)—6.5-7.5

Color—Blue-green

Viscosity—150-200cps

Specific Gravity—1.06

Miscibility—complete

Stability

- a. Shelf @ 24°C/75°F—In excess of two years
- b. Accelerated @ 49°C/120°F—In excess of 180 days
- c. Freeze/Thaw—Can withstand three cycles

Biodegradable

Phosphate free

Kosher and Pareve

PACKAGING:

Clean on the Go concentrates are packaged in attractively labeled 2-liter containers; 4 per case. Super-Glo is designed for use with the Clean on the Go 3-Sink Chemical Management System. Concentrate label copy and secondary labels are available in English, Spanish, and French. Product specific Material Safety Data Sheets are included in each case.

Be sure to read all Directions, Precautionary and First Aid Statements on product labels before use of this or any Spartan product. If questions remain, consult your employer or a physician. Material Safety Data Sheets for all Spartan products are available from your authorized Spartan distributor or by visiting www.spartanchemical.com.

GUARANTEE:

Spartan's modern manufacturing and laboratory control insure uniform quality. If dissatisfied with performance of product, any unused portion may be returned for credit within one year of the date of manufacture.
