# Paramount™

## Foam Skin Care System

Pro-Link's Paramount Skin Care system is boldly designed and engineered for ease of servicing and the highest reliability.

### Bold Design

The sleek lines and colorful formulations call attention to a dispensing system that is boldly different. Attention can result in increased usage for improved hand hygiene throughout your facility. Paramount offers touch free or manual dispensing to meet any facility's needs.

Select the size option that offers optimal use in your environment: the high-capacity dispensers accommodate fewer change-outs in high traffic areas while the small footprint dispensers fit compact spaces.

### Easy to Service. Built to Last.

Paramount touch free and manual dispensing systems are designed for the highest reliability and ease of servicing while maximizing appeal to encourage good hand hygiene in any facility.

- **At a Glance Status** – The large sight windows combined with vivid soap colors makes it easy to check when a new refill is needed.
- **EnergySense™** – Touch free dispensers optimize energy use, eliminating the need to change batteries in most installations. The batteries are included and pre-installed, allowing for quick activation of the system.
- **ABS Construction** – ABS is a light-weight blend of plastics and rubber, offering unsurpassed strength, impact resistance and rigidity ensuring the dispenser looks new throughout its life.
- **FlexLock™ Technology** – FlexLock adds the ability to convert to a locking or non-locking cabinet by removing the key inside – whenever you want – to prevent product theft or tampering.
- **Factory Sealed Refills** – Snap into place quickly and easily, minimizing labor time while protecting users from the contamination risks of unsealed soap refills.
- **Smart Collapse™ Bottles** – Using the latest technology, the refills retain their shape as they empty – collapsing from the back – providing a more attractive, freshly filled appearance.
- **Easy to Recycle** – Durable, recyclable PET material provides crystal clarity while using 30% less material than rigid HDPE material. Removing the collar on the refill is a snap, making recycling easier than ever!
- **Lifetime Performance Guarantee** – Paramount dispensers offer a “bumper to bumper” Lifetime Performance Guarantee that even includes the batteries in the touch-free system.
- **Safety Compliance** – All dispensers are ADA compliant. The touch free model is UL/CE registered and automatically shuts off when opened to make refilling easier.

Choose the Paramount dispenser color to match your facility's decor.

## Rich, Luxurious Foam Soap

Paramount Foam Soap refills feature fresh new fragrances with scientifically advanced formulas that set new standards for sensory appeal, sustainability and performance. Choose from a selection of luxurious foam formulations enriched with moisturizers, natural extracts and skin conditioners. Whether you prefer the sensory appeal of vivid colors and fragrances, or a fragrance- and dye-free option for environments with sensitive tenants, our portfolio of foam soap refills delights users and supports a healthy environment.

## Paramount Accessories

To keep your facility looking its best and encourage good hand hygiene, Pro-Link's Paramount Series Dispensers offer the following options:

- **MESSENGER™ Station** – Promote good hand hygiene with messages attached to the dispenser using pre-designed messages – such as Please Wash Your Hands – or create your own using a standard 3" x 4" name badge template. Requires TRUE FIT wall plate.
- **TRUE FIT™ Wall Plate** – Use to cover up larger footprints left by prior dispensers. Install anytime – during or after dispenser installation.
- **SHIELD Floor & Wall Protector** – Tight fitting shield protects floor, wall and countertop appearance. May also be secured with a screw.

## Green Features for a Sustainable Environment

Floral Foam, Mixed Berry and Light & Mild Foam soap refills are EcoLogo certified

All refills are made with renewable resources and qualify as USDA BioPreferred products for Federal preferred procurement

All refill bottles are made with durable, recyclable PET material that provides clarity while using 30% less material than rigid HDPE material

## Are you washing your hands with germs?

Open, refillable bulk soap dispensers can put your business at risk

A study<sup>1</sup> conducted by the University of Arizona under the direction of microbiologist Dr. Charles P. Gerba showed:

**25%** of refillable bulk soap dispensers contained unsafe levels of bacterial contamination

**16%** of the samples contained coliforms, illness causing fecal-based organisms

Use Pro-Link's factory sealed soaps to help stop the spread of germs.
