

# DCS Twister™ Floor Pads

**Diamonds are a Floor's Best Friend**

*Twister™ is a revolutionary cleaning system consisting of floor pads containing billions of microscopic diamonds which clean and polish the floor mechanically instead of using chemicals. Twister™ can be used on most common floor surfaces such as terrazzo, natural stone, concrete, vinyl and epoxy. Twister™ transforms dull, worn floors into clean, glossy and brightly polished floors. Twister™ has unique advantages that benefit both the cleaning company and the facility owner.*

DCS – Diamond Cleaning System . . . Now Distributed by Pro-Link

## DCS Twister™

### A solution for every type of floor

#### DCS Twister™ Standard

The DCS Twister™ Standard is a three step process that is performed during routine cleaning. For optimal results, each Twister™ step normally requires 2-3 weeks, depending on the condition of the floor when you start the process. No extra time or effort is required for the Twister™ Standard method. Use Twister™ White for daily maintenance until a clean, uniform surface appears. Change to Twister™ Yellow to increase the luster. Now, the brilliance of the floor appears. Continue the process with Twister™ Green and the result will be an incomparably shiny and clean floor. For daily maintenance, use Twister™ Green to maintain the floor's shine and splendor.

#### DCS Twister™ Intensive

The DCS Twister™ Intensive is basically the same process as Twister™ Standard however, each step is repeated for 6-10 consecutive passes. The Twister™ Intensive method is performed outside the standard cleaning routine. Twister™ Intensive has the advantage of immediately upgrading the floor. Depending on the machine efficiency and the initial wear on the floor, large areas can be finished in one working day.

#### DCS Twister™ Extreme

The DCS Twister™ Extreme is the ultimate method for creating extreme shine and luster. The floor is polished with a high-speed machine and a Twister™ Green pad. All types of high speed machines can be used.

#### Outstanding quality...

*clean floors to a high gloss every day*

Twister™ pads bring out the beautiful features of your floor. The results achieved are unbelievable! The Twister™ method is unique in that periodic maintenance, polish and waxes are no longer needed! The secret behind the outstanding result is the use of mechanical cleaning with billions of microscopic diamonds.

- **High level of gloss.**
- **Extreme cleanliness.**
- **Easier maintenance.**

#### Cost efficient...

*faster, easier and cheaper cleaning*

Twister™ can be used on any type of floor with no change of cleaning method or cleaning equipment needed. This, combined with the absence of periodic maintenance and the long life of the Twister™ pads, cuts both cost and cleaning time. Twister™ is also a cost-effective choice due to eliminating the use of chemical based cleaning methods. With Twister™, the floor owner gets a cleaner floor with a higher gloss. The cleaning contractor creates a high quality surface easier and faster.

- **Reduces your cleaning time.**
- **No periodic maintenance needed.**
- **Extended pad life.**
- **No chemicals needed.**

#### Environmental sustainability...

*eco-friendly cleaning, just add water*

Choosing environmentally compatible cleaning methods benefits everyone. The Twister™ method is the only totally environmentally friendly alternative to traditional chemical-based cleaning. At the same time, Twister™ is so effective that the result is a clean and hygienic floor without any need for layers of wax or polish. Choose the eco-friendly concept by using Twister™ for daily floor maintenance.

- **Reduced chemical usage – only water needed in daily cleaning.**
- **No wax, polish or periodic maintenance is needed.**

### Twister™ White 800 Grit

Step 1 for the Standard or Intensive Twister™ method. Twister™ White removes tiny scratches from the surface and leaves a clean and well prepared silky matt surface for the subsequent Twister™ steps.

### Twister™ Yellow 1500 Grit

Step 2 for the Standard or Intensive Twister™ method. This stage leaves a surface that is well prepared for the final step of the Twister™ method.

### Twister™ Green 3000 Grit

Final step for the Standard or Intensive method and also for daily maintenance of the floor. This step will effectively maintain a high gloss on the surface when used regularly. Twister™ Green is ideal for use on most floor surfaces such as stone, vinyl and linoleum floors. It works well for high-speed polishing of smooth concrete, terrazzo and natural stone surfaces. Twister™ Green is also very effective in maintaining polished vinyl and linoleum floors.

## User friendly...

*the same routine with better results*

With the Twister™ system you only need water for cleaning. Dry mop the floor, select the appropriate Twister™ pad, add water and start your auto scrubber. This is all you have to do to get a perfect finish.

- **The Twister™ pads fit all types of machines and are available in a number of different sizes.**
- **Twister™ replaces your regular pads and chemicals. Your regular cleaning routine remains the same.**
- **Twister™ is an effective method that saves time. One cleaning phase with Twister™ is enough, even on the most demanding surfaces!**
