

Ice Melter Residue Clean Up

Green Certified Neutral Floor Cleaner

Equipment Needed: Pump-Up Sprayer and Mop OR Autoscrubber

1. Assess the soil load/residue on the surface.
2. Fill Pump-Up Sprayer with Heavy Duty cleaning solution (8oz per gal)
3. Pre-Spray area with Heavy Duty cleaning solution. Be sure to saturate the surface thoroughly. Keeping the surface wet is key to residue removal.
4. Let the product sit for 2-3 minutes.
5. Use a mop bucket or autoscrubber with clean water to remove the excess liquid. Change your water frequently to make sure you're not putting salt residue back on the floor.
